

# MiTag

## USER MANUAL

MiTag For Android

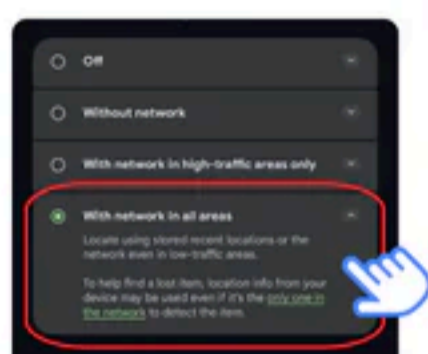

### Product Overview

MiTag is a smart tracker device that uses Google's Find My Device service, paired with the "Google Find My Device" app on Android devices, to quickly and securely locate your personal items on Google Maps. All location information remains private, and even Google cannot access it.

### Before You Start

- MiTag only supports the "Google Find My Device" app. Please make sure to download and install this app from the "Play Store" before use.
- The device is compatible only with Android devices running **Android 9 or higher**. MiTag does not support Huawei devices.
- Once MiTag is paired with a device, it will be locked and cannot be paired with another device.
- **Please follow this step and finish the set up after you download the "Google's Find My Device" app.**  
-> Settings -> Search "Find My Device" -> "Find your offline devices" -> Choose "With network in all areas"

### Button and Sound Instructions

**Power On:** Press the button once (a beep will sound).

**Power Off:** Press and hold the button for 5 seconds (two short beeps will sound).

#### Reset:

1: Open the "Google Find My Device" app, select your MiTag, tap the Settings button, then tap "Remove from Find My Device" and confirm.

2: After removing it, press the MiTag button 6 times rapidly, and when you hear a long beep, the device will be reset.

**Note:** Please power on the MiTag and remove the device from the "Google Find My Device" app before resetting.

### Quick Start

#### Add MiTag

1. Make sure your phone's Bluetooth and network are turned on.
2. Press the button once to turn on MiTag (a beep will sound).
3. Bring MiTag close to your Android device and wait for the pop-up to show MiTag. (Remark: If no pop-up appears, please restart your phone and try again).
4. Tap "Connect", read and accept the prompts to complete the pairing.
5. In the "Google Find My Device" app, select "MiTag" to customize the device name and Category.

### Manual Set Up Instruction (If you miss the pop-up)

1. Open Settings.
2. To "Google".
3. Click on "All Services".
4. In the "Connected Devices & Sharing" menu, select "Devices".
5. Enable "Scan for Nearby Devices".
6. MiTag will appear in the list of available nearby devices.
7. Click on it and follow the on-screen instructions to complete the connection.

### Function description

#### Find Nearby

In the "Google Find My Device" app, select your MiTag and tap "Play Sound" to locate your device. Once found, tap Stop Sound to silence the device.

#### Find Far Away

In the "Google Find My Device" app, select your MiTag, tap the device to view its location.

To navigate to the location, tap "Get Directions" to open map navigation.

#### Enable Lost Mode

In the "Google Find My Device" app, select your MiTag and tap "Mark as Lost".

Add your contact information and you will get a notified if the **Find My Device** network locates it.

#### MiTag Location Sharing

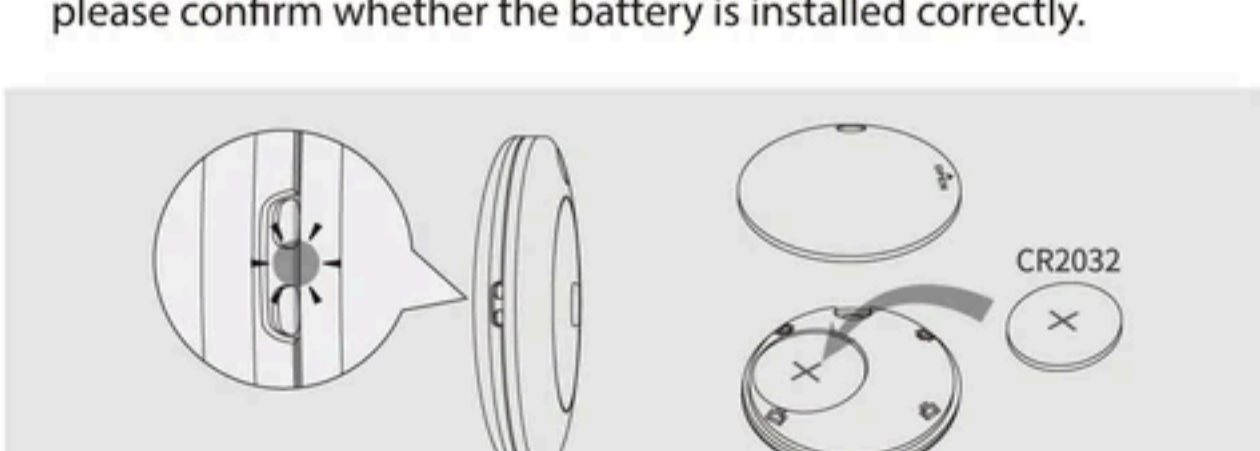

In the "Google Find My Device" app, select your MiTag, then tap "Share Device".

#### Connect to another phone

After completing the reset process, then connect to another Android phone.

### Battery replacement

1. Find the slots on the left side and open it with both hands, or you can try using a sharp object to pry it open.
2. Remove the battery.
3. Insert the new CR2032 battery into the device with the positive (+) side facing up.
4. After inserting the battery, align the slots and attach the top cover. Turn off and then restart the device. If there is no sound, please confirm whether the battery is installed correctly.

\*After replacing the battery, you can use it without reconnection.
